

WellRec 5600 VoIP Recorder

WellRec 5600 is a dedicate **VoIP recorder for Welltech SIP network architecture**. Just simply setting the **subscriber or the target list** to be logged in WellSIP 6500, WellRec 5600 will do the recording on demand no matter incoming call or outgoing call. Through the web interface, administrators can easily search and play the recorded VOIP call anywhere. It provides a very cost/effective solution to meet your VOIP logging service.

WellRec 5600 can also be a **lawful interception or voice monitor system**. Administrator can monitor the conversation real time either by recording channel or selected subscriber without any delay.
